### Recommended Bulb

Beads works with a variety of different LED bulbs. LED globe bulbs 500 - 800 lumen output and from 2700K - 3000K colour temperature. These styles are particularly effective in the white colour and in the metallic options for a softer less reflective look. LED filament style bulbs will bring out the reflective qualities of the metallic finishes brilliantly. Best performance would be from 600-900 lumen output with 2200K - 2700K colour temperature
